FLOORING

CLEANING/CARE

RENOVATIONS

I LOVE WOOD. IT SMELLS GOOD AND FEELS GREAT.

HOME

GOOD TO KNOW: FLOOR CARE AT HOME

Wooden flooring feels warm, is hard-wearing and easy to care. To preserve these exceptional properties of natural wood for a long time, treat wood flooring preferably with Polyx®-Oil from Osmo. Polyx®-Oil repels dirt and provides durable protection for wood. At the same time, it allows the wood to breathe and it feels great. A further advantage: maintenance is easy. With very little effort, you can maintain your wood flooring over generations. If necessary, you can even re-oil it without sanding and also carry out spot repairs.

> **DUSTING**
Dust and lint can be removed quickly and easily with the green Dust-Mop in the Osmo Cleaning Kit for Floors. It is suitable for all wooden flooring.

> **MOPPING**
With Osmo Spray-Mop, regular wet care is a breeze. The cleaner Spray-Fix is sprayed from a cartridge on the handle directly onto the floor. Alternatively you can clean the floor with the Micro-Mop Plush and Wash and Care. Both Spray-Fix and Wash and Care contain moisturizers that preserve the beauty of your floor for a long time. By all means, avoid the use of all-purpose cleaners.

> **INTENSIVE CLEANING AND REFRESHING**
Before your wooden flooring becomes dull, clean it thoroughly with Osmo Liquid Wax Cleaner. As a result, your floor retains its beautiful appearance and becomes even more resistant.

> **RESTORATION AND REPAIR**
Sometimes even flooring given optimal care shows signs of wear and tear. No problem: flooring treated with Polyx®-Oil can be easily repaired and re-oiled, and spot repairs (page 13) are also possible. Then your floors will shine like new again.

WOODEN FLOORS ARE A GOOD INVESTMENT. PLUS THEY LOOK GREAT.

PUBLIC

GOOD TO KNOW: FLOOR CARE FOR PUBLIC INTERIORS

Well-kept wooden flooring creates atmosphere – plus it can withstand a lot. Oiled flooring repels dirt and is suitable for public buildings and commerical use. However, the cleaning intervals should be adapted for the higher demands.

> **REGULAR MOPPING**
Clean high traffic areas once daily with a damp mop. Add only Osmo Wash and Care to the mop water. Avoid the use of aggressive all-purpose cleaners.

> **INTENSIVE CLEANING AND REFRESHING**
When necessary, clean and refresh wooden flooring intensively with Osmo Maintenance Oil – cleaning intervals depend on the amount of traffic.

> **RESTORATION AND REPAIR**
To retain the look and value of your wooden floor over years, worn areas must be recoated with Osmo Polyx®-Oil at the right time. First the floor should be intensively cleaned and then apply an extremely thin layer of Polyx®-Oil (page 10). Spot repairs are also possible, for example, on high traffic areas.

OUR TIP

When maintaining larger areas, it is a good idea to commission a professional craftsman. A workload reduction is possible with the Osmo FloorXcenter. It is well-suited for the cleaning and maintenance of oiled floors.

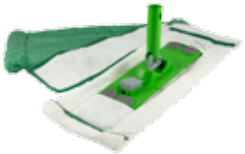
LIFE IS TOO SHORT FOR THE WRONG CARE. TAKE A LOAD OFF.

DUSTING

An oiled wooden floor repels dirt. Unlike many other types of flooring, it does not develop an electrostatic charge and does not offer breeding grounds for microbes and allergens. Dust, lint or animal hair can be removed with a vacuum cleaner or broom. Cleaning is even easier with the Osmo Cleaning Kit for Floors. The green Dust-Mop was specifically developed for dusting.

> Fast, quiet and energy-saving: cleaning with the Dust-Mop.
> Osmo Cleaning Kit for Floors contains a basic mop head with connector for the Osmo System Telescopic Handle, a Dust-Mop, a Micro-Mop Plush and an Active Fibre Cloth.

Dust-Mop



Cleaning Kit for Floors

REGULAR MOPPING

How often your wood flooring has to be mopped depends on the demands placed on it. For private households, once a week is normally enough, for restaurants and other high traffic areas, you should mop floors daily.

> With one touch: Osmo Spray-Mop has a cartridge filled with the cleaner Spray-Fix. Ideal for the fast, occasional spot cleaning of flooring.

> For damp mopping with the Osmo Cleaning Kit for Floors, use the white Micro-Mop Plush.

> A dash of Osmo Wash and Care in mop water removes everyday dirt and grime exceptionally. Thanks to its natural oils, it prevents the floor from drying out. Avoid the use of aggressive all-purpose cleaners.

> **NOTE:** only use a damp mop – not wet! If required dry afterwards.

Wash and Care

Cleaning Kit for Floors

INTENSIVE CLEANING AND REFRESHING

From time to time, your wooden flooring needs refreshing. For private households, generally this is first necessary after some months. Osmo Liquid Wax Cleaner is ideal for such applications. The protective oil-wax layer is regenerated and your floor retains its special shine. For high traffic areas in restaurants and retail shops, Osmo Maintenance Oil should be used. It was especially developed for these areas. Regular refreshing could make sense here. Cleaning intervals depend on the amount of use.

> Osmo Liquid Wax Cleaner cleans and regenerates in one step. Also available as a spray.
> Osmo Maintenance Oil regenerates without forming a layer, special for commercial and public interiors.
> For white oiled floors: Liquid Wax Cleaner or Maintenance Oil in White Transparent.
> For larger areas, we recommend the floor cleaning machine FloorXcenter.

MAINTENANCE AND RE-OILING

Sometimes life leaves marks, even on optimally maintained wood flooring. No need to fret. The protective surface of oiled wood flooring can be renewed any time without needing to remove the old finish. This is a huge advantage over lacquered wood surfaces.

> Before the application clean floors thoroughly.

> Manual applications: apply an extremely thin layer of Osmo Polyx®-Oil with the Osmo Floor Brush or Microfibre Roller.

> Machine applications: Osmo FloorXcenter for intensive cleaning and the application of a clear Osmo Polyx®-Oil.
For difficult-to-reach edges and corners, use the Osmo Pad Holder with joint.

THE SPECIALIST TAKES OVER

You can re-oil your wooden flooring by yourself. But if you do not have the time to do it, do not wait too long to call a specialist. Raw wood should not lay open. Thanks to their wealth of experience, a specialist can complete the job quickly and reliably. This is especially the case for spot repairs. Plus if you want to change the gloss level or recoat coloured wooden flooring, it is recommended to seek professional support.

NOTE

Further tips on spot repairs can be found in our Flooring brochure about the topics optimal protection, cleaning/care and renovation.

1. Thoroughly sand off the damaged surface.
2. Apply a thin coat of Osmo Polyx®-Oil with the Microfibre Roller.
3. When dry, apply a second coat very thinly with a cotton cloth.

SPOT REPAIRS ON CLEAR TREATED WOODEN FLOORING

On oiled floors, spot repairs can be carried out. For example, high traffic areas can be re-oiled without needing to clear out your restaurant or the entire room. This saves a lot of time. Because Osmo Polyx®-Oils, when applied correctly, do not form a film, even after several touch-ups no transitions can be seen.

> Sand off the damaged surface thoroughly and remove all dust.
> Apply a thin coat of Polyx®-Oil evenly with Osmo Microfibre Roller.
> Allow to dry for about 8-10 hours.
> When dry, apply a further coat of Polyx®-Oil thinly with a lint-free cotton cloth.

SPOT REPAIRS ON COLOUR TREATED WOODEN FLOORING

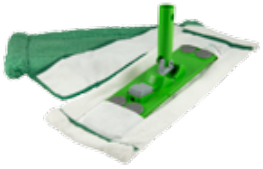
Even individual areas of coloured wooden flooring can be repaired and refinished – if they are treated with Osmo products. Therefore always keep the colour tone or mixing ratio in mind for later treatments. To achieve exactly the right colour tone, precise work steps and a little experience are needed.

> Sand off the damaged surface thoroughly and remove all dust.
> Apply a thin coat of Polyx®-Oil Tints or of a mixture evenly with Osmo Microfibre Roller and allow to dry for 24 hours.
> Afterwards apply a thin coat of clear Polyx®-Oil and allow to dry.

TIP
To repair small damages and scratches, use Osmo Polyx®-Oil Repair and Care Paste. Simply apply the paste in a small, handy 75 g tube to any surface treated with Osmo Polyx®-Oil.

ONLY THE BEST FOR WOOD

Further information about our products can be obtained from your local authorized dealer or found in our Flooring brochure about the topics optimal protection, cleaning/care and renovation and also online at www.osmo.de/en.



CLEANING KIT FOR FLOORS

For the maintenance and care of wood, synthetic, tiled and natural stone floors. Contains basic mop head plate with connector for Osmo System Telescopic Handle, Dust-Mop, Micro Mop Plush and Active Fibre Cloth.

WASH AND CARE

Cleaning and care concentrate for regular damp maintenance. Especially developed for wood flooring treated with Osmo Polyx®-Oils.

LIQUID WAX CLEANER

Clear or White Transparent. For refreshing dull flooring. Cleans and regenerates at the same time and provides the wood with natural hard waxes.

LIQUID WAX CLEANER SPRAY

Clear Liquid Wax Cleaner as a spray. Cleans and regenerates at the same time and provides wood with natural hard waxes.

MAINTENANCE OIL

With Maintenance Oil, dull and matt floors are restored. By applying Maintenance Oil at the right time, time-consuming sanding works and repairs can be avoided.

MAINTENANCEMAINTENANCE KIT FOR FLOORS

The Maintenance Kit for Floors contains 1 litre Wash and Care, 0.4 litre Liquid Wax Cleaner Spray, 3 applicator cloths and comprehensive care instructions for your wooden flooring.

POLYX®-Oil

For the complete or spot refinishing of wooden flooring previously treated with Osmo Polyx®-Oil. Available in 4 gloss levels: 3011 Gloss, 3032 Satin, 3065 Semi-Matt, 3062 Matt.

POLYX®-OIL CARE AND REPAIR PASTE

Clear oil-wax combination for repairing small damages in all wood surfaces treated with Polyx®-Oil. Osmo Polyx®-Oil Care and Repair Paste is based on natural plant oils and waxes.

PAD HOLDER WITH JOINT

For the manual application of base coat wood finishes from Osmo and for the intensive cleaning of edges and corners. Includes connector for Osmo System Telescopic Handle.

SYSTEM TELESCOPIC HANDLE

High quality aluminium Telescopic Handle with SoftTouch grip and Quick Connect technology. Adjustable length: 120-200 cm.

FLOOR ROLLER SET

For the manual application of all hardwax oils. Contains roller tray with ridged area, disposable tray inserts (3 pieces), Microfibre Roller (250 mm wide), roller frame with connector for Osmo System Telescopic Handle.

FLOOR BRUSH WITH HANDLE

Thanks to the ergonomic handle and connector for Osmo System Telescopic Handle, it is suitable for the manual application of Polyx®-Oils and Wood Wax Finishes. Available in the widths 220 and 400 mm.

FLOORXCENTER

User-friendly single disc machine for cleaning, refreshing, maintaining and colouring oiled floors. Ideal for large areas and for the machine maintenance of your wood flooring.

SPRAY-MOP

With this innovative cleaning system, the cleaner Spray-Fix is sprayed from a refillable cartridge on the handle directly onto the wood floor. With machine-washable Active Fibre Mop.
